

# Paper-based flexible packaging

## Information

**Description:** Flexpack with paper is booming. The reasons are manifold. Marketers often praise sustainability. But in practice, paper packaging is often more complicated as plastic. We discuss the advantages and challenges of using paper as the main ingredient for food packaging. The topic of disposal and sustainability in terms of environmental protection is also discussed.

**Target group:** Anyone involved in flexible paper packaging is welcome to attend.

**Level:** **Level 1** - no previous knowledge required
