

Progressive flexpack recycling technologies - Inno-Talk Europe

Informationen

Beschreibung: You can achieve recyclability of your packaging with basically two approaches: A common way these days is to adapt the packaging material to existing infrastructure. The other (and longer) way is to develop a more progressive recycling infrastructure.
We would like to present two very progressive technologies. Will they enable the re-use of flexible packaging materials in valuable applications and replace virgin materials?
Learn about the latest knowledge and available recycling methods in this Inno-Talk Europe.

Zielgruppe: Decision-makers along the labels and flexpack supply chain and anyone who wants to find out more about flexpack in terms of technology and strategy.

Niveau: **Stufe 3** - Vorkenntnisse sind sinnvoll
