

Progressive flexpack recycling technologies Information

Description:

You can achieve recyclability of your packaging with basically two approaches: A common way these days is to adapt the packaging material to existing infrastructure. The other (and longer) way is to develop a more progressive recycling infrastructure.

We would like to present two very progressive technologies. Will they enable the re-use of flexible packaging materials in valuable applications and replace virgin materials? Learn about the latest knowledge and available recycling methods in this Inno-Talk Europe.

Target group: Decision-makers along the labels and flexpack supply chain and anyone who wants to find out more about flexpack in

terms of technology and strategy.

Level: Level 3 - Previous knowledge is useful

duration: 1:20h **Further information:**
